Interpreting 4.0 – The New Dimension of Simultaneous Interpreting

Remote Simultaneous Interpreting

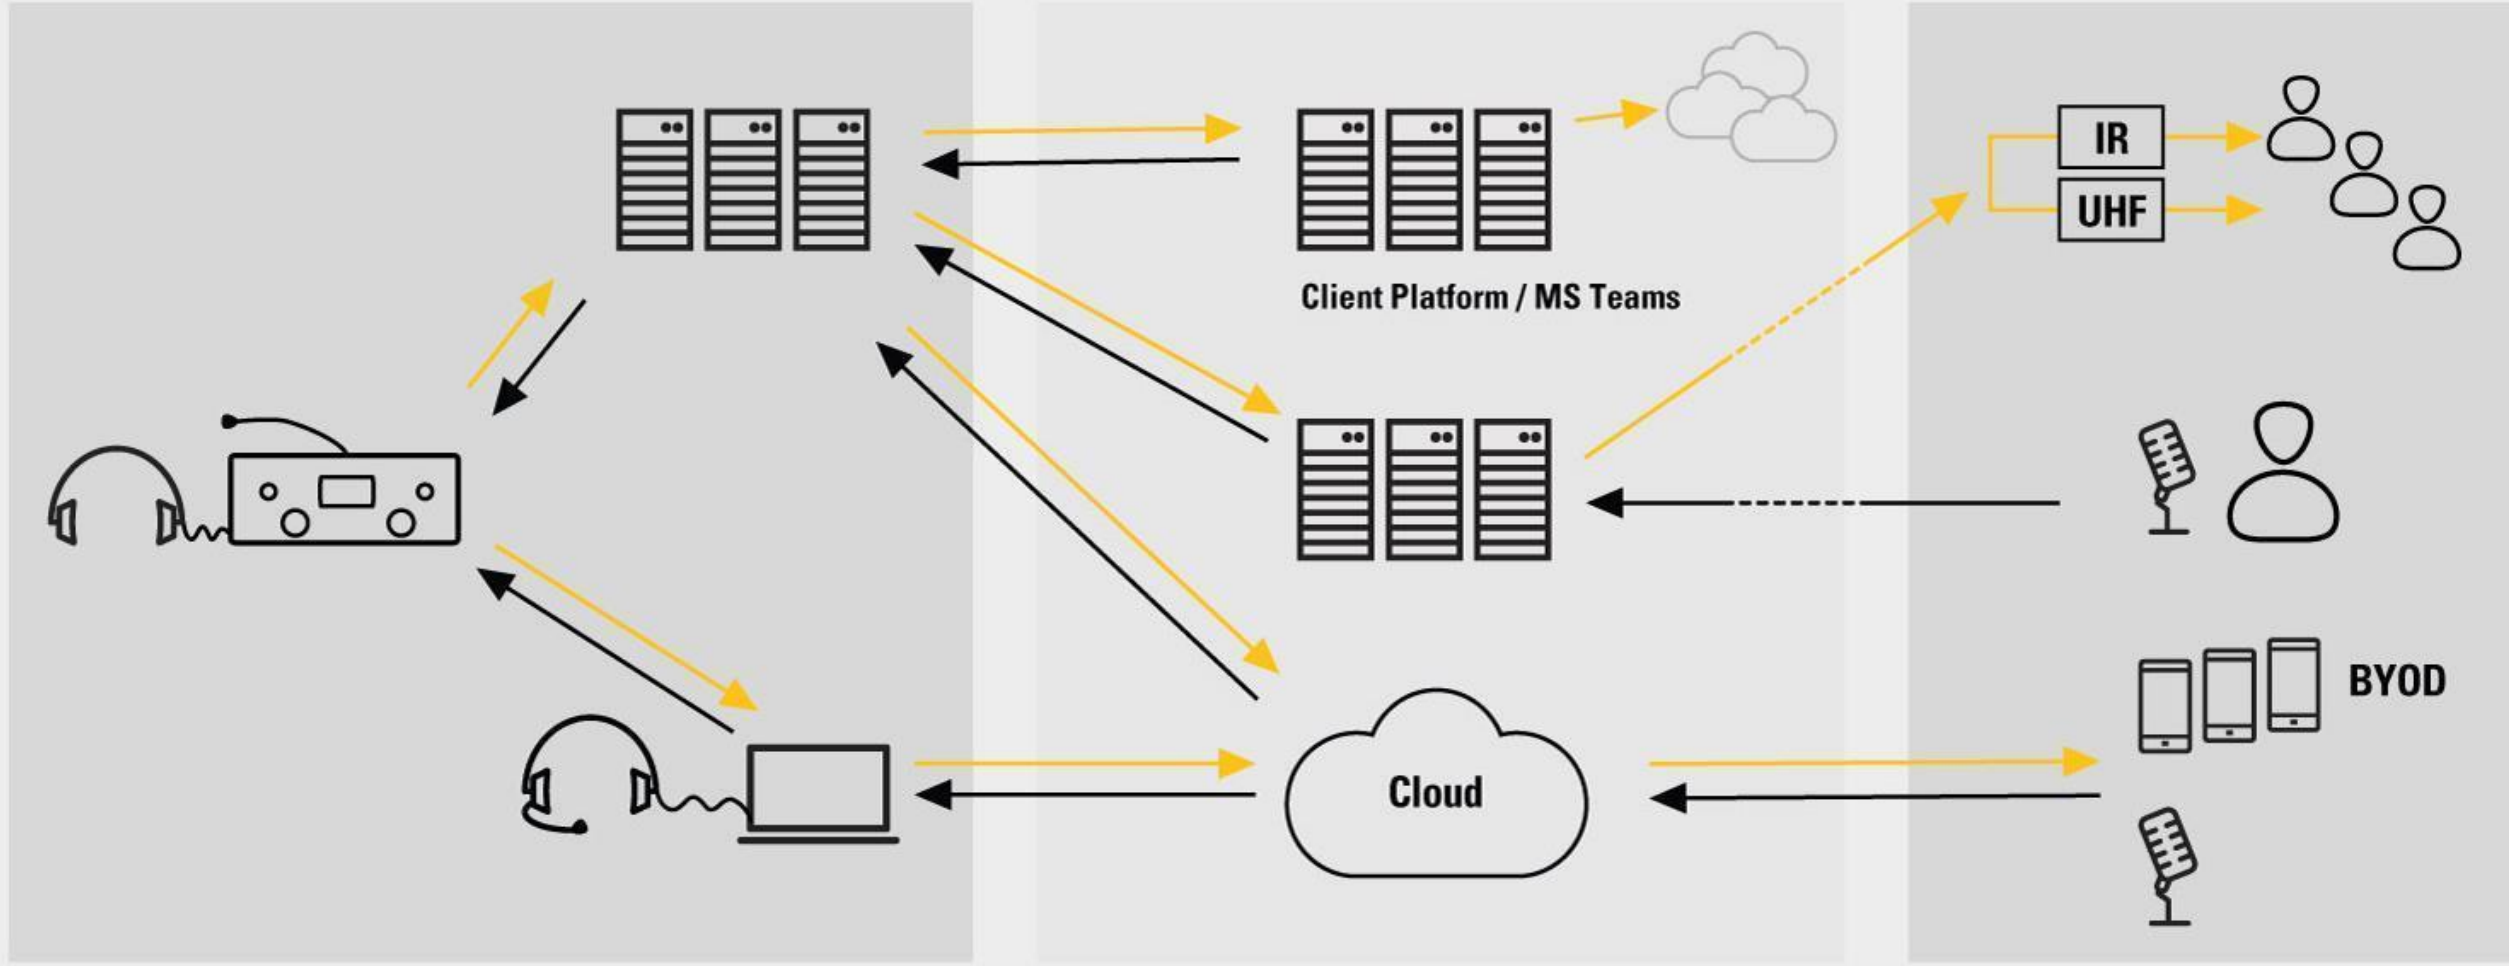

- simultaneous interpreting is still regarded as being complex and time-consuming in terms of personnel and logistics
- **Remote Simultaneous Interpreting** represents a large step in the development of congresses and conferences, whereby interpreters do not need to be present at the actual conference location itself
- Their connection to the "spoken word" is the data line linking their workplace to the venue and the speaker's microphone via an "interpreter hub"
- Event organisers increase their flexibility as well as the scalability of their service regardless of the language or location or of the duration and size of the event

Hub

Transmission

Venue

RSI provides various connection options for different event formats, whereby data security is always our top priority.

Benefits for Organisers

Simple implementation of multilingual capability at international events.

- No more booths at the event itself:
 - reduction of set-up and dismantling times, personnel deployment, materials and logistics activities; no laborious concealing of the booths, no space problems
 - simplified accreditation and registration processes
 - reduced travel and accommodation expenses
 - customer can "take along" their own experienced interpreters
- Implementation of virtual or hybrid formats:
 - remote connection of simultaneous interpreters increases the – international – reach of events
- Synergies:
 - multiple parallel events or break-out sessions can be covered at the same time
 - savings thanks to coverage of a number of short events on the same day
- Reception via:
 - conference receiver (IR/UHF)
 - BYOD (app/landing page)
 - meeting platform

We Offer

- our own server-based high-end solution or provision of interpreting without having to depend on a specific platform (including cloud-based)
- hub with proven interpretation technology taking DIN/ISO standards into account
- Security:
 - redundancy
 - cyber security
 - end-to-end and real-time monitoring
 - expert technical support
- expert and highly professional consulting from our in-house conference interpreter regarding simultaneous interpreting and multilingual capability at events
- use of permanent RSI hub in Neuhausen (alternatively: temporary hubs at the event itself or at other N&M sites)
- integration into client platforms is possible
